7 **REPORTS FROM OTHER BODIES:**

8 **REPORTS OF EXTERNAL MEETINGS AND COMMITTEES:**

Local Parish Councils' Liaison meeting: Simon D'Vali attended the meeting to provide information on the opportunity for Local Councils to purchase SIDs, (Speed Identification Devices) to help influence the developing service level agreement. Each battery powered SID is expected to cost £2.5k inc VAT, with an option for Local Councils to provide their own maintenance, data download and battery replacement (with initial training provided by Bradford Council); or to pay Bradford Council to do the maintenance for them (at a cost of £1k per year). Batteries are likely to need replacing every two weeks depending on number of triggers. The SIDs would be mounted initially in stealth mode to gather some base data, ahead of them being switched on to show motorists their speed and gather data on traffic volumes and speed. SIDs have been proven to be very beneficial in reducing traffic speeds, they are usually deployed in areas where impact can be made, rather in areas where enforcement is needed.
